Sir,

I wish to register my objection to the positioning of a speed hump which according to the small poster attached to a nearby lamp post, is apparently going to be installed directly in front of my living room and bedroom windows.

This will inevitably increase noise levels of traffic going over the humps which will create a nuisance for me not only during the day but also because of the location will cause noise at night disrupting sleep

I have lived at my present address for 34 years and during this time I have not been aware of any road accidents in the vicinity of my house so clearly this can not be an issue, if you have statistics that show that this section of Wallington Road is a high accident black spot i would dearly like you to show them to me.

All measures to prevent accidents are of course laudable however have you considered other measures to reduce vehicle speeds ie. Vehicle-Activated speed limit warning signs.

If there is no practical alternative than to install speed humps in Wallington road for traffic calming measures, could i request that you consider positioning the speed hump that is going to be installed outside of my house to be repositioned opposite Halton court this is a small open area which will not be directly in front of any house windows and therefore much less of a nuisance.

Regards.
